THE SPIRIT OF SAFETY

## ► MYZEL Lifecycle Platform

**Manage your machine lifecycle! Digital. Safe. Secure.**

Companies face the same questions every day:

- Is our machinery legally compliant and do we satisfy all the applicable verification and documentation obligations?
- What tests were carried out and when, and where can we find important evidence such as validation documents and conformity declarations?
- Are our employees sufficiently qualified and are our certificates still valid?

The MYZEL Lifecycle Platform provides you with clear answers that are structured, reliable and available at all times. For the first time, the platform combines employee and machine management in one digital SaaS solution.

### Why choose the MYZEL Lifecycle Platform?

Because we provide you with comprehensive support in the fields of safety, security and compliance, focussing on the four core values.

#### Employee protection

All qualifications, training courses and safety requirements at a glance. Greater safety for employees, less downtime.

#### Liability protection

Complete, legally compliant documentation stored in a central location. Reduced risks during audits, official inspections and accidents.

#### Productivity

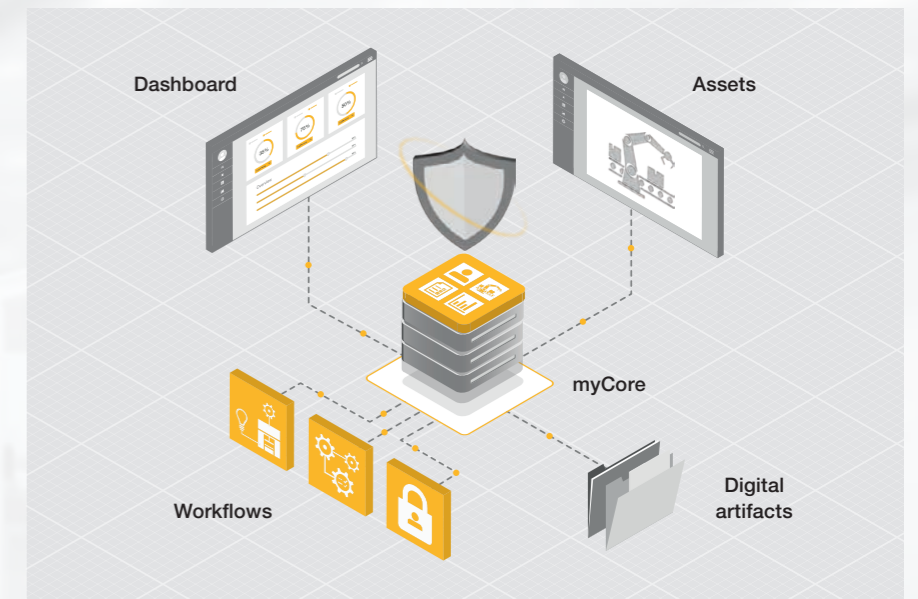

Maintenance, validation and emergency information immediately available. Fewer breakdowns, more efficient processes, increased availability.

#### Data protection

EU hosting and ISO-certified security standards. Unbeatable data security without additional effort.

### What does the MYZEL Lifecycle Platform offer?

#### The heart of the solution: myCore

The central storage location for your digital artifacts and assets:

- Employees, machinery, components
- Instructions, maintenance schedules, validations and conformity declarations
- Training certificates and guidelines

#### Your dashboard: With one click, everything in view

You gain real-time insights into analyses customised according to your specifications:

- Degree of fulfilment of the four core values
- Status of employee qualifications and conformity of your machinery
- Expiring documents and urgent tasks

#### Digital workflows – Support over your entire machine life cycle

##### mySafeDesign – Safe machine design

- Risk assessments including AI-supported identification of risks via image recognition
- Validation of new machinery

##### mySafeOperation – Safe machine operation

- Templates for statutory inspection obligations, maintenance and recurring validations for existing machinery

##### myAccessControl – Secure access management

- OT security for plant and machinery
- Management of employee authorisations and qualifications

# ▶ Your benefits at a glance

Use the MYZEL Lifecycle Platform and benefit from these and many other advantages:

- ▶ 24/7 – available any time and anywhere for unbeatable transparency
- ▶ Structured document storage for legal compliance and evidence
- ▶ Digital checklists avoid errors and ensure seamless processes
- ▶ Liability risks are reduced thanks to complete verification documentation
- ▶ Greater safety for employees and machinery
- ▶ Efficient processes mean less downtime and greater productivity
- ▶ Maximum data security – EU hosting, certified in accordance with ISO/IEC 27017 and ISO/IEC 27018

## Experience the MYZEL Lifecycle Platform live!

In your personal demo, we show you how MYZEL can sustainably enhance your safety and security, compliance and documentation processes.
