## **Pilz Machinery Safety webinar series updated for 2024**

Corby, UK, 26.02.2024 - **Pilz Automation Technology are continuing their series of free Machinery Safety webinars throughout 2024, with some new additions to the schedule.**

New to the series, 'Understanding safety requirements during maintenance' will extol the virtues of an effective and regular maintenance programme, something that can save money, time, and lives. 'The right controller for every application', also new, will take webinar attendees through the myriad of controllers available on the market, whilst guiding them towards the correct one for their own application.

The webinars aim to share the essential facts and updates on a range of key machinery safety topics and updates, covering key facts in a short session. Participants will also have the opportunity to get instant support for specific questions with a question-and-answer function available throughout the presentations.

Adding to Pilz' portfolio of popular machinery safety training courses and seminars, the hour-long webinars all start at 09:30.

If you find the time or date of any of the webinars isn't suitable for your schedule, please register anyway and a recording of the webinar will be sent directly to you shortly after broadcast.

Upcoming Webinars include:

- [Delivering PUWER effectively - Friday 8 March 2024](#)
- [Understanding safety requirements during maintenance - Friday 22 March 2024](#)
- [The right controller for every application - Friday 26 April](#)

For the full 2024 webinar schedule further details of each topic and to register, click the link below to be taken to the Pilz Events page:

## **Pilz - The Spirit of Safety**

Pilz is a global supplier of products, systems and services for automation technology. As a pioneer of safe automation, Pilz creates safety for human, machine and environment. Founded in 1948, today the family business with its head office in Ostfildern is represented worldwide with 2500 employees in 42 subsidiaries and branches.

The technology leader offers complete automation solutions for Safety and Industrial Security on the machine. These include sensor, control and drive technology - as well as systems for industrial communication, diagnostics and visualisation. An international range of services with consulting, engineering and training completes the portfolio. Pilz solutions are used in many industries beyond mechanical engineering, such as intralogistics, packaging, railway technology, or the robotics sector for example.
